

2010 Open Studios Art Tour

Submitting Images of Your Artwork

Here are the requirements for your submission: 4 images of your artwork, and if possible, a candid shot of you at work in your studio (**not** grinning at the camera!). You may specify which art image you prefer for the directory.

1) True photographs (continuous tone); no inkjet or laser prints, no promotional postcards. Nothing over 8 1/2 x 11 inches, please.

OR:

2) A CD containing your artwork in the following format: 300 dpi TIFF or JPG files, minimum 2 x 3 inches (vertical or horizontal), 8-bit CMYK color. TIFF or JPG files can be produced by your Mac or PC, and should be openable on my Mac.

If you are using a digital camera: avoid harsh, artificial lighting. This type of camera works best in natural light without high contrasts. Its advantage is your ability to shoot, then view your results immediately and adjust accordingly. Use a plain, clean, neutral background. Avoid these background mistakes: siding and decks; wrinkled cloth; anything dirty; anything that diverts attention from your artwork.
